Apocalyptic and post-apocalyptic fiction

Nuclear warfare, pandemic, alien invasion, some sort of impact event (meteors falling from the sky and introducing alien “germs” or near-impact knocks Earth out of its orbit), cybernetic revolt (Robots Take Over the Earth!), technological malfunction, supernatural phenomena (think vampires and werewolves and zombies, OH MY!), divine judgment (Rapture), global climate change or pollution, resource depletion, severe natural disasters and the fall of civilization are some of the many elements that make up Apocalyptic and post-apocalyptic fiction.

Obviously, some of these elements lead to others, i.e. war can bring on technological malfunction, the fall of civilization, etc., so categorizing can be difficult. (Some will be found in multiple categories.)

The titles marked with an asterisk (*) can be found on the shelves of the Peabody Public Library, the others may be obtained through interlibrary loan.

**War**
